1 INTRODUCTION

The purpose of the “Back on Track” module is to remember pages your visitors have seen recently in order to allow them to access the same pages easily.

You can setup the number of pages you want to store i.e. the users can see as “Recently viewed” and choose the location for “Recently Viewed” box.

Important:

The “Back on Track” module consists of two parts (modules), which are:

- **Back on Track – Tracker** – this part of the “Back on Track” module **tracks and stores pages** each of your visitors have visited; this module should be added to each page you want to have tracked (see section 3.1 for further information on adding the module to a page)
 - **Note: “Back on Track - Tracker”** part of the module has to be hidden so that it could not be seen by the end users (see section 3.3)
- **Back on Track – Viewer** – this part of the “Back on Track” module is used for **displaying the pages your users have visited**; you can use the “Settings” option inside this module to determine how the pages history is displayed, the preferred number of pages, etc. (see section 4.3 for further information about adjusting these settings)

Each of these modules should be installed separately.

Note: this manual assumes prior experience with DotNetNuke application. For further information about DotNetNuke, please consult the DotNetNuke manual.

2 INSTALLATION PROCEDURE

Since the “Back on Track” module consists of two separate modules. You should follow these instructions to install both modules before you start using the modules.

Included in your download are two module zip files plus the source zip file (if you have purchased the source)

- **DataSprings_BackOnTrack_Tracker.zip** – installation file for installing “Back on Track - Tracker module”
- **DataSprings_BackonTrack_Viewer.zip** – installation file for installing “Back on Track - Viewer” module

Important: the procedure will be explained for “**Back on Track - Tracker**” module, but you should follow these same instructions for installing “**Back on Track - Viewer**” module as well.

In order to install your “Back on Track” module, login with an account to your DNN site as a host or administrator account. Once logged in, Navigate to the Admin or Host menu item, and click on the “Module Definition”.

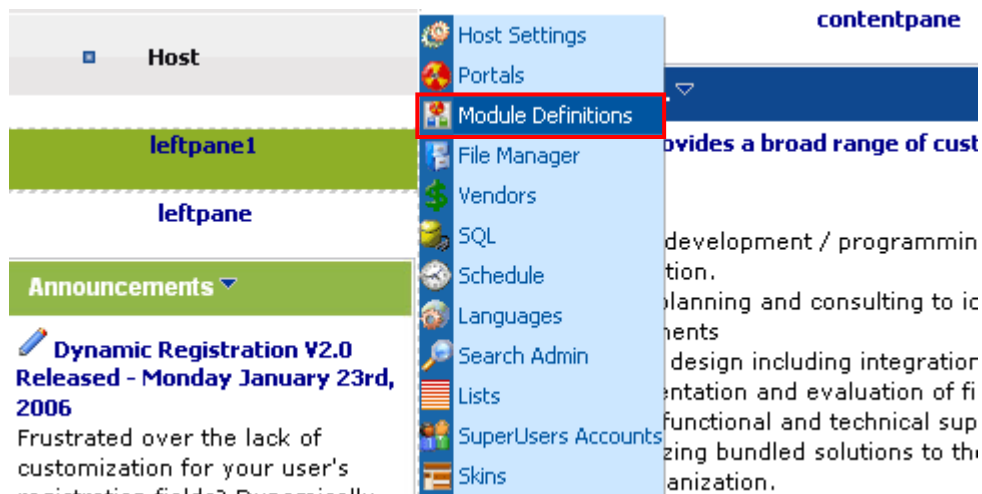

Figure 1: Installation procedure (step 1/7)

The following screen will be displayed.

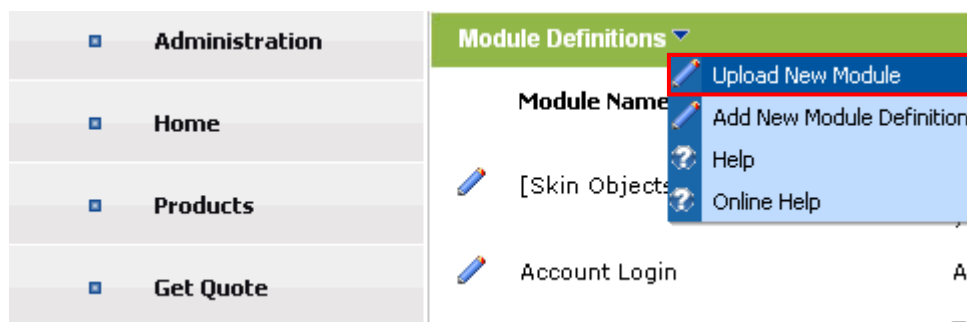

Figure 2: Installation procedure (step 2/7)

Click on the “Upload New Module” to continue installing “Back on Track” and the following screen will be displayed.

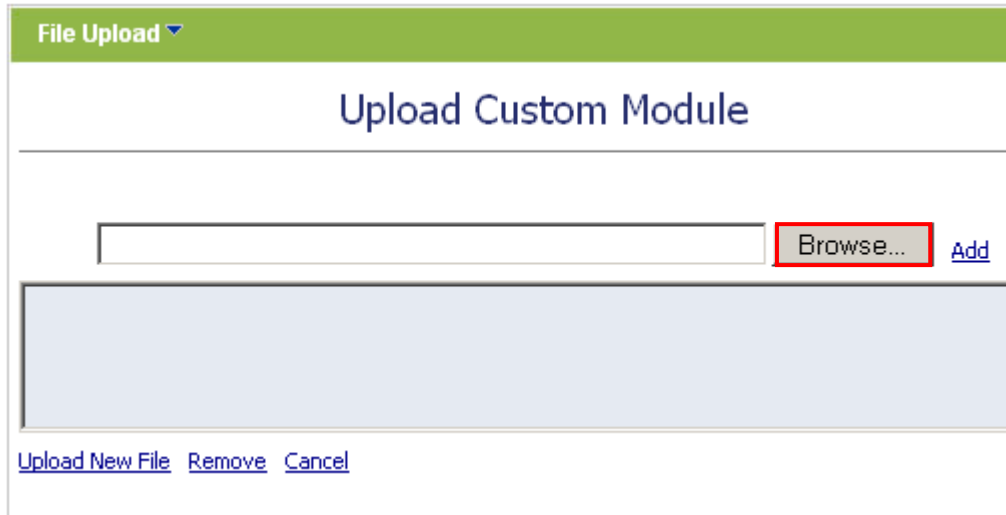

Figure 3: Installation procedure (step 3/7)

Click on the "Browse" button and the dialog window for locating the installation file "DataSprings_BackOnTrack_Tracker.zip" will be displayed.

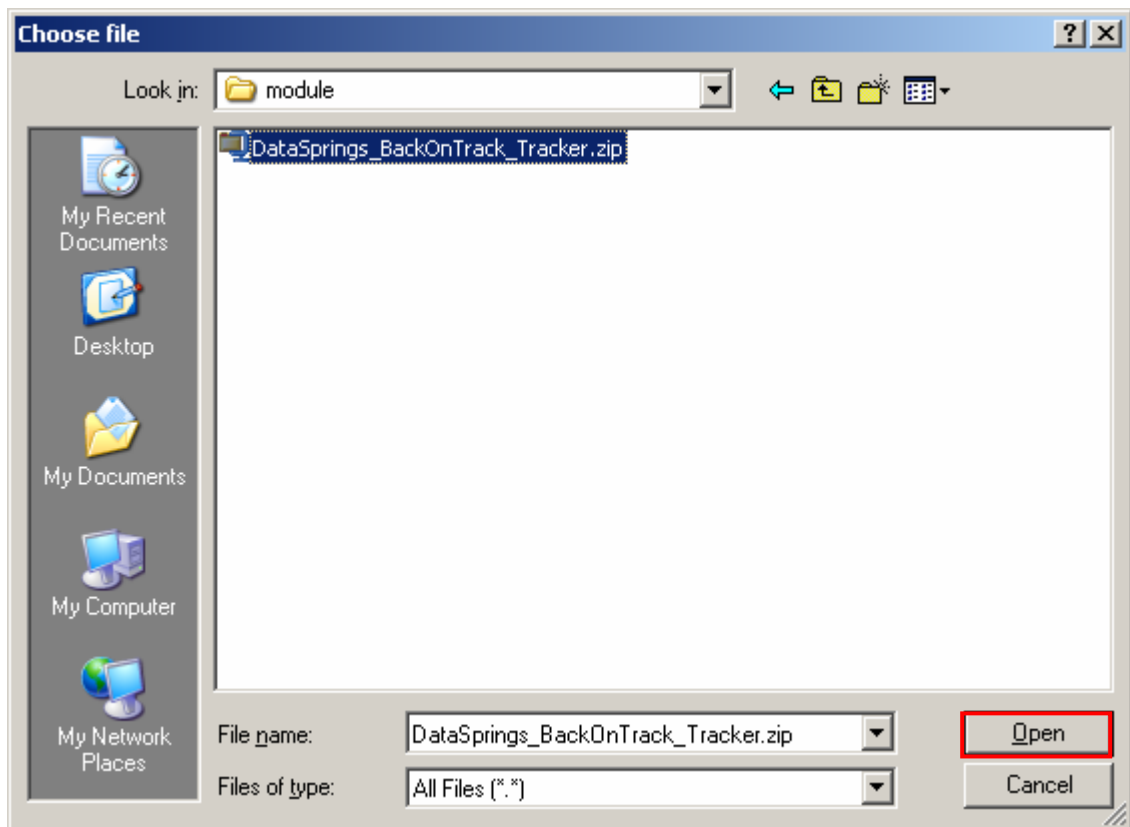

Figure 4: Installation procedure (step 4/7)

Locate the "DataSprings_BackOnTrack_Tracker.zip" and click on the "Open" button. The following screen will be displayed.

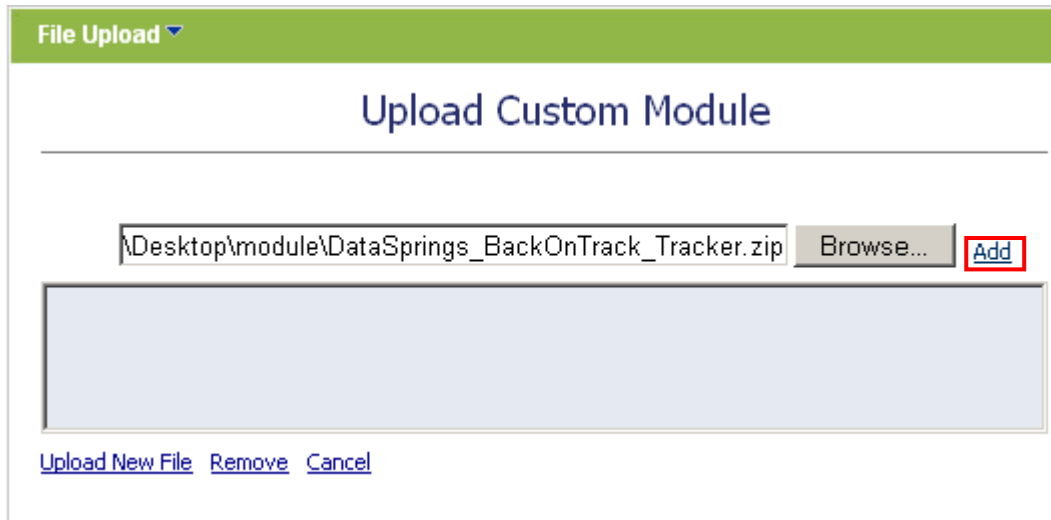

Figure 5: Installation procedure (step 5/7)

Click on the “Add” link inside this screen in order to add the module and it will be added to the list.

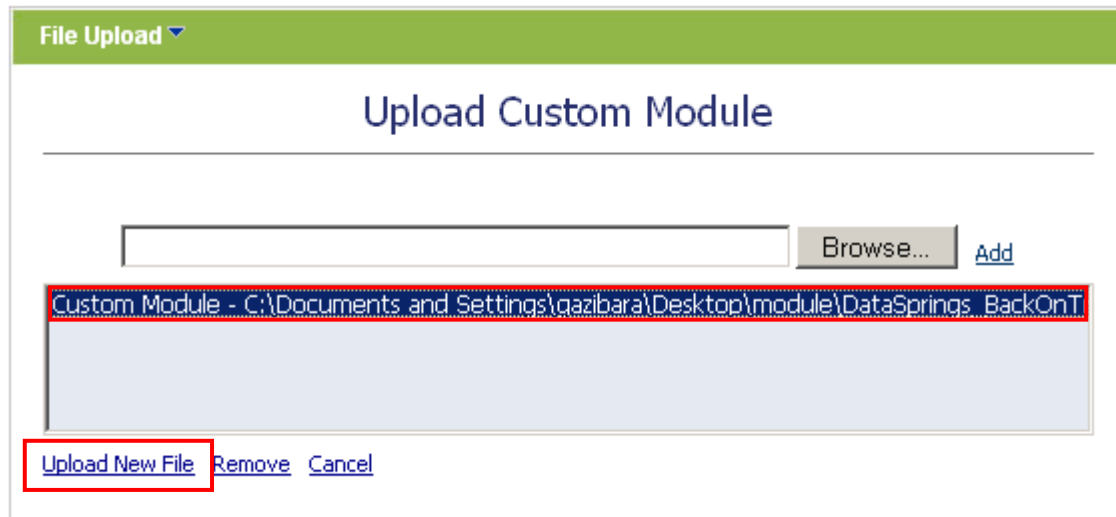

Figure 6: Installation (step 6/7)

Select the “**DataSprings_BackOnTrack_Tracker.zip**” file and click on the “Upload New File” link. The installation will begin and in couple of moments the screen informing you on successful completion will be displayed.

Default Page: **Select A Web Page From Your Site:**

[Update](#) [Cancel](#) [Delete](#)

Figure 22: Managing "Back on Track - Viewer" settings

The following options are available inside this screen:

- **Max Listings** – enter a maximum number of recently viewed pages you want to be displayed to the user
- **Prefix** – enter prefix text that you would like to be displayed in front of the title of each page (i.e. *).
- **Ignore IP Address for Authenticated Users** – check this checkbox if you want ignore the pages registered users visited while using the website without logging in first; unselect this

option if you want to track all pages (both pages they visited as logged in users and those visited while using the site without logging in)

- **Display W/Page** – use this option if you want to display the date user has viewed the page
- **Hide Current Page** – check this checkbox if you want the module to **hide the page user is currently viewing** from the recently viewed list
- **Purge Listings** – click on the “Purge All Tracking Results” to delete all stored information about the visited pages i.e. make the module forget all viewed pages
- **Header Text/HTML** – use this field to enter any additional text that will be displayed before the links
- **Align** – use this option to set the desired alignment for the module
- **Default Page** – select the page that will be displayed to the user in case he is visiting the website for the first time, so there are no recently viewed pages

After setting these parameters, click on the “Update” link in order to save the changes.

4.4 Deleting “Back on Track – Viewer”

In order to delete “Back on Track – Viewer” part, choose option “Delete” from the main menu.

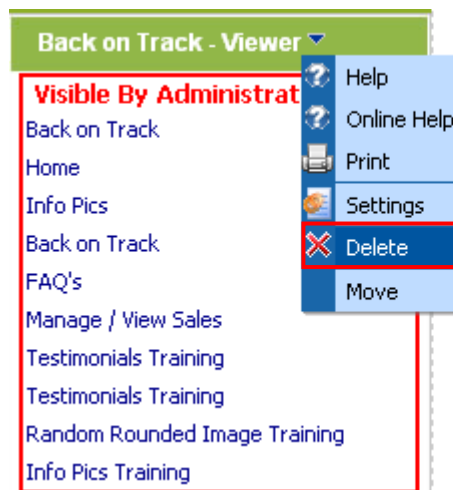

Figure 23: Deleting a viewer part of the module (step 1/2)

The confirmation dialog will be displayed.

Figure 24: Deleting a viewer part of the module (step 2/2)

Click on the “Ok” button and the module will be deleted.
