1 INTRODUCTION

Stock Quotes provides you with an easy method of displaying up to date financial and stock information on your DotNetNuke portal.

You can utilize the module in multiple ways, displaying stock information for just one particular stock, or adding multiple stocks to the module. You can configure the layout of the module, including the header, item, and footer templates, while also providing optional features such as the ability for users to add their own stocks to the module if they wish.

Features:

- Stock Quotes for DotNetNuke provides you with up to date stock quotes (only 20 minute delays!). For each stock symbol you can retrieve the following:
 - Stock Symbol
 - Last Trade Price
 - Last Trade Date
 - Last Trade Time
 - Price Change
 - Day Open Price
 - Day High Price
 - Day Low Price
 - Volume
 - Market Cap
 - Prev Close Proce
 - Percentage Change
 - 52 Week Range (low to high)
 - EPS
 - PE
 - Company Name
- Setup as few or as many stock symbols to be displayed
- Set the sort order of each ticker symbol

Additional Features:

- Optionally allow the user to add their own stocks to the list. If they add their own stocks they will be displayed right underneath the stocks the administrator has defined.
- Optionally set a header or footer to the stock module
- Get creative! Add links back to financial institutions for particular stocks and add images, graphics, detailed stock information with each stock symbol.

2 INSTALLATION PROCEDURE

Included in your download are either one (If you only purchased the PA) or two (If you purchased the PA and Source Code) zip files. One zip file is the source code to the application, and the other zip file is the module which you can upload to your site.

When you extract the files, you will notice that it extracts two zip files (**note:** only one if you just purchased the PA).

- **DataSprings_StockQuote_ModulePA.zip** - file for installing “Stock Quotes” with your DNN
- **DataSprings_StockQuote_Source.zip** - source zip file you can use in order to make any changes to the application (**note:** meant for advanced users)

In order to install your “Stock Quotes” module, login with an account to your DNN site as a host or administrator account. Once logged in, Navigate to the Host menu item, and click on the “Module Definition”.

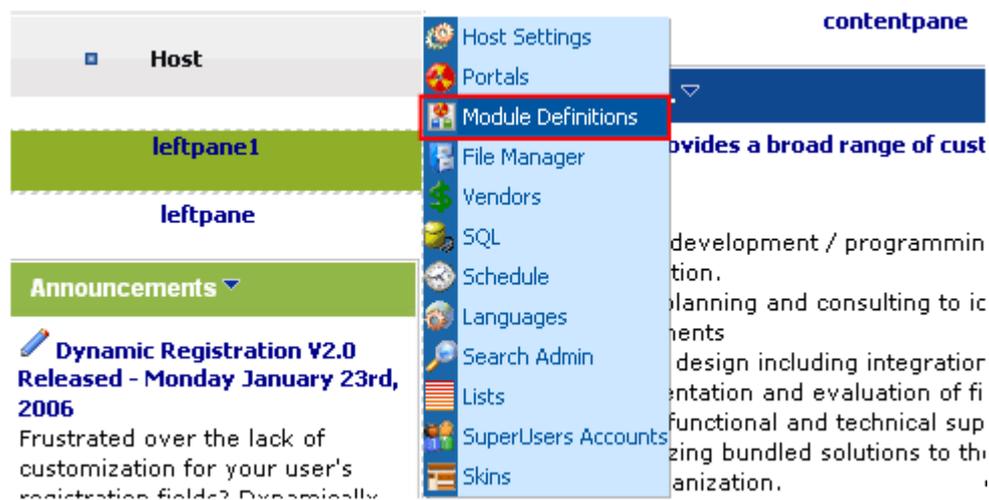

Figure 1: Installation procedure (step 1/6)

The following screen will be displayed.

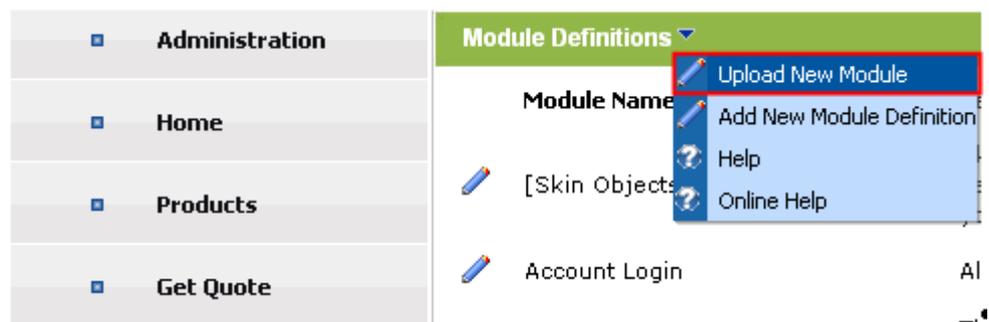

Figure 2: Installation procedure (step 2/6)

Click on the “Upload New Module” to continue installing “Stock Quotes” and the following screen will be displayed.

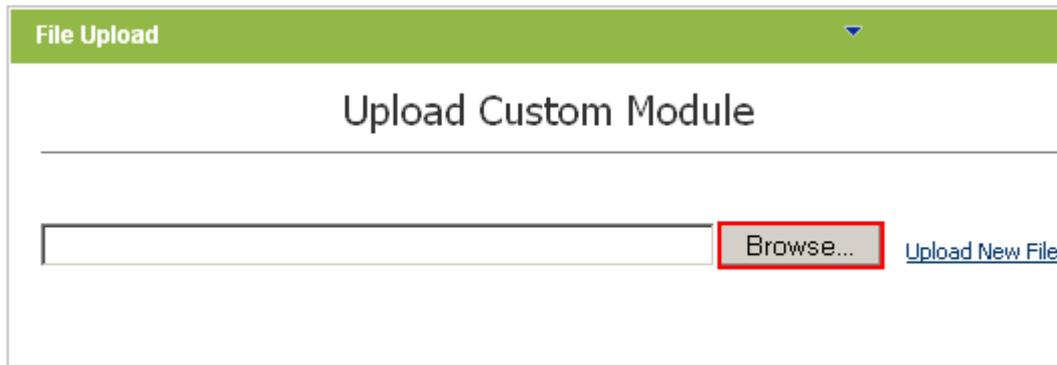

Figure 3: Installation procedure (step 3/6)

Click on the “Browse” button and the dialog window for locating the installation file “**DataSprings_StockQuote_ModulePA.zip**” will be displayed.

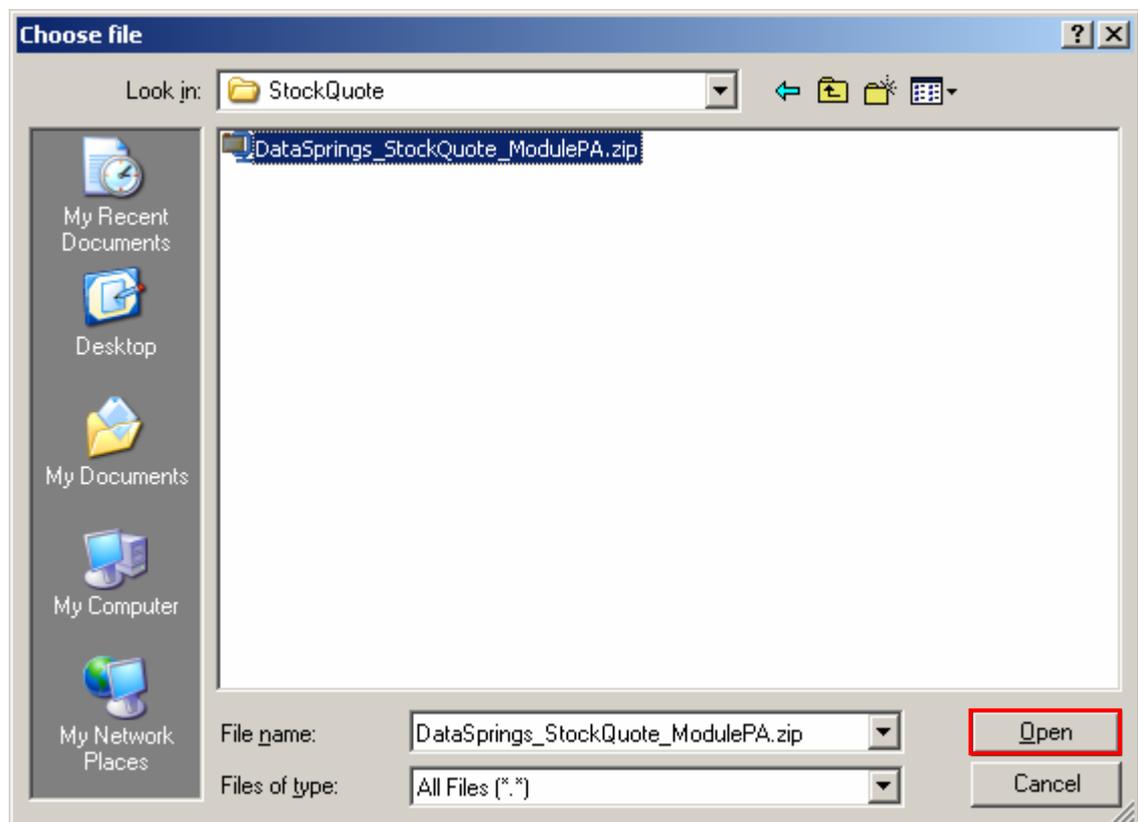

Figure 4: Installation procedure (step 4/6)

Locate the “**DataSprings_StockQuote_ModulePA.zip**” and click on the “Open” button. The following screen will be displayed.

Figure 5: Installation procedure (step 5/6)

Select the “**DataSprings_StockQuote_ModulePA.zip**” file and click on the “Upload New File” link. The installation will begin and in couple of moments the screen informing you on successful completion will be displayed.

Note: please keep track of any errors that appear during the installation. These errors can be helpful if your module has problems.

3 ADDING STOCK QUOTES MODULE TO A PAGE

In order to add “Stock Quotes” module to a desired page follow these steps:

1. Select the “Add New Module” radio button
2. Choose “Stock Quotes” from the “Module” pull down menu
3. Click on the “Add” link (or the arrow icon .

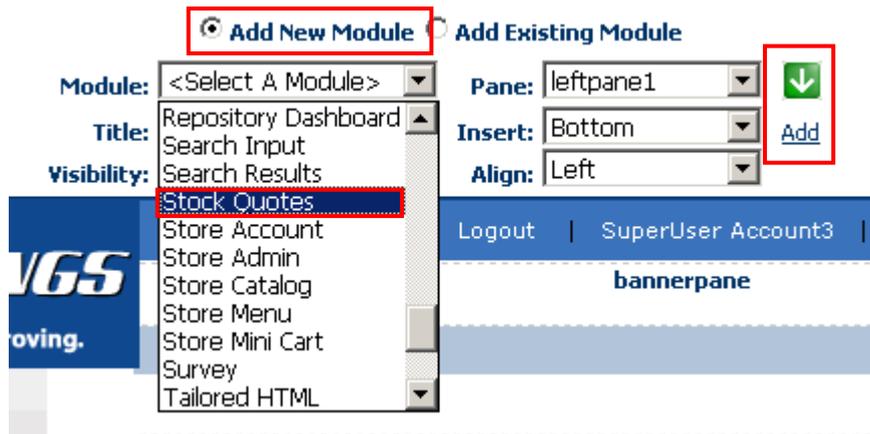

Figure 7: Adding a module to a page

The “Stock Quotes” module will be added to the page. Click on the arrow next to the title of the module in order to open the main menu.

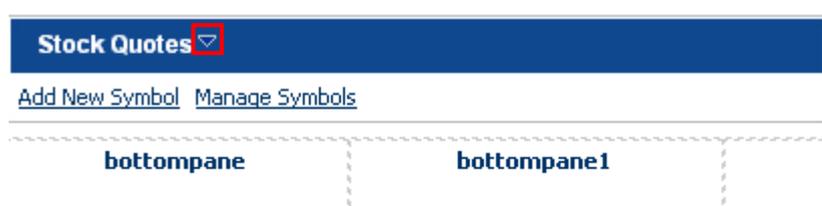

Figure 8: Opening the module main menu

Note: see section 4 for further information on main menu options.

4 STOCK QUOTES MAIN MENU

This section of the document will give the definition of the “Stock Quotes” main menu options. In order to start using the main menu, click on the arrow next to the title “Stock Quotes”.

Figure 9: Opening the main menu

The following options are available inside this screen:

- **Add New Symbol** – option for managing template (see section 5)
- **Manage Symbols** – option for managing the search options (see section 6)
- **Help** – this user guide
- **Print** – option for printing the contents of the page
- **Settings** – option for managing settings (see section 7)
- **Delete** – option for deleting a module (see section 8)
- **Move** – option for placing the module in the desired part of the page:
 - Move To leftpane
 - Move To bannerpane
 - Move To contentpane
 - Move To rightpane
 - Move To bottompane
 - Move To bottompane1
 - Move To bottompane2

5 ADDING A NEW SYMBOL

In order to add a new symbol, choose option “Add New Symbol” from the main menu.

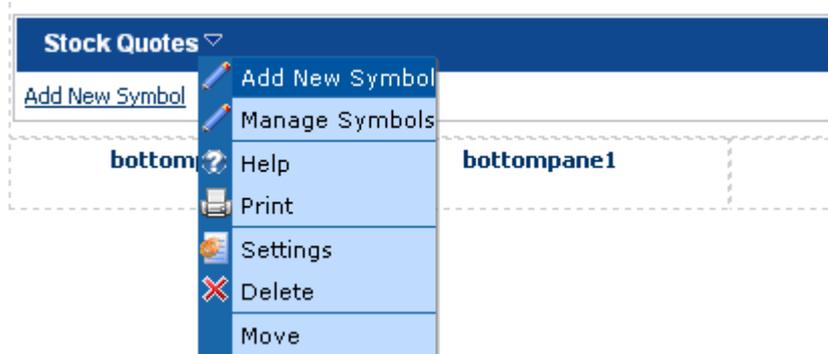

Figure 10: Adding a new symbol (step 1/2)

The following screen will be displayed.

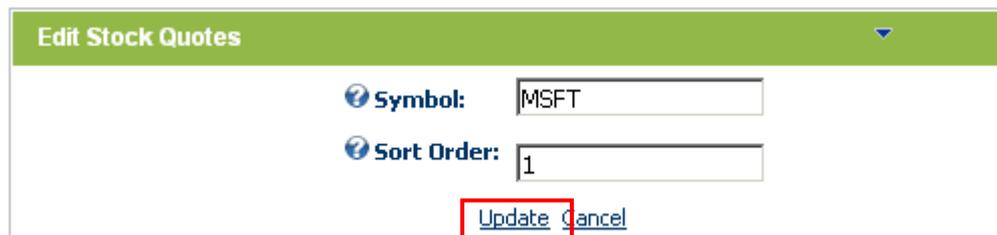

Figure 11: Adding a new symbol (step 2/2)

The following parameters are available inside this screen:

- **Symbol** – field for entering the stock quote symbol (**e.g.** “MSFT”)
- **Sort Order** – field for setting the desired sort order for the symbol (**e.g.** “1”)

After setting the desired parameters, click on the "Update" link and the new symbol will be added.

6 MANAGING SYMBOLS

In order to start managing the symbols, choose option "Manage Symbols" from the main menu.

Figure 12: Choosing option "Manage Symbols"

The following screen will be displayed.

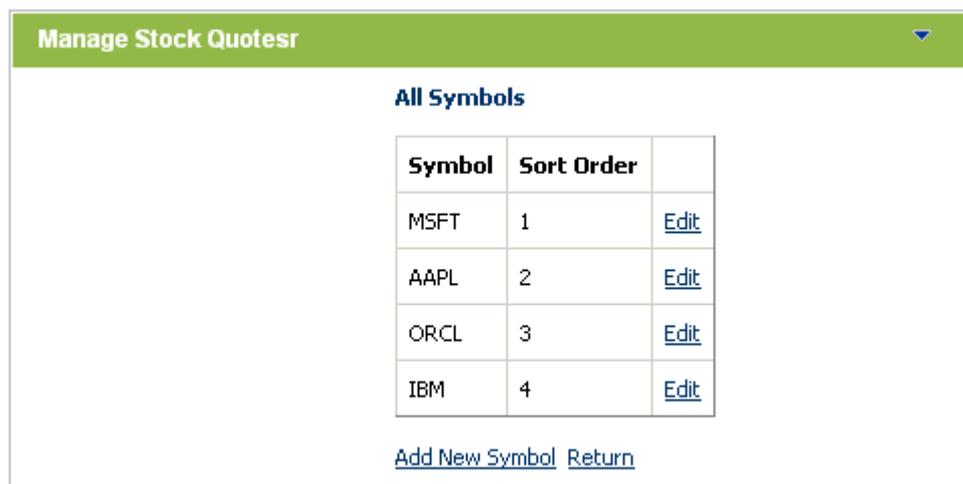

Figure 13: Managing the symbols

The following parameters and options are available inside this screen:

- **Symbol** – field displaying the label defined for the symbol
- **Sort Order** – field displaying the sort order for the symbol
- **Edit** – option for editing an existing symbol
- **Add New Symbol** – option for adding a new symbol (see section 5)
- **Return** – option for returning to the main screen

7 MANAGING STOCK QUOTES SETTINGS

In order to start managing the module settings, choose option “Settings” from the main menu.

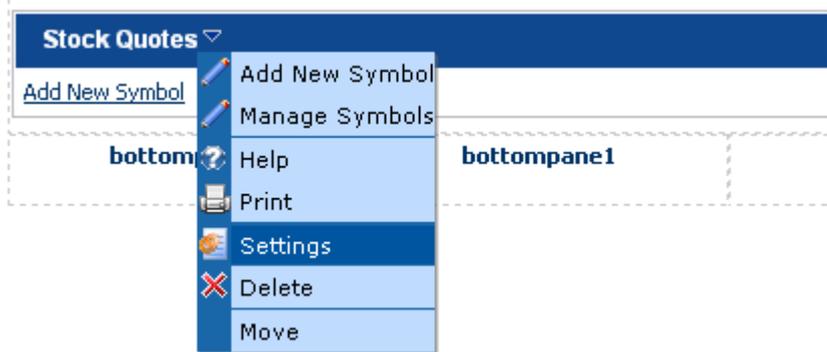

Figure 14: Choosing option "Settings" from the main menu

The following screen will be displayed.

Module ▼

⊟ Module Settings

In this section, you can define the settings that relate to the Module content and permissions (ie. those settings that will be the same on all pages that the Module appears).

⊟ Basic Settings

Module Title:

Permissions:	View Module	Edit Module
Administrators	<input type="checkbox"/>	<input checked="" type="checkbox"/>
All Users	<input type="checkbox"/>	<input type="checkbox"/>
Registered Users	<input type="checkbox"/>	<input type="checkbox"/>
Subscribers	<input type="checkbox"/>	<input type="checkbox"/>
Unauthenticated Users	<input type="checkbox"/>	<input type="checkbox"/>

Inherit **View** permissions from **Page**

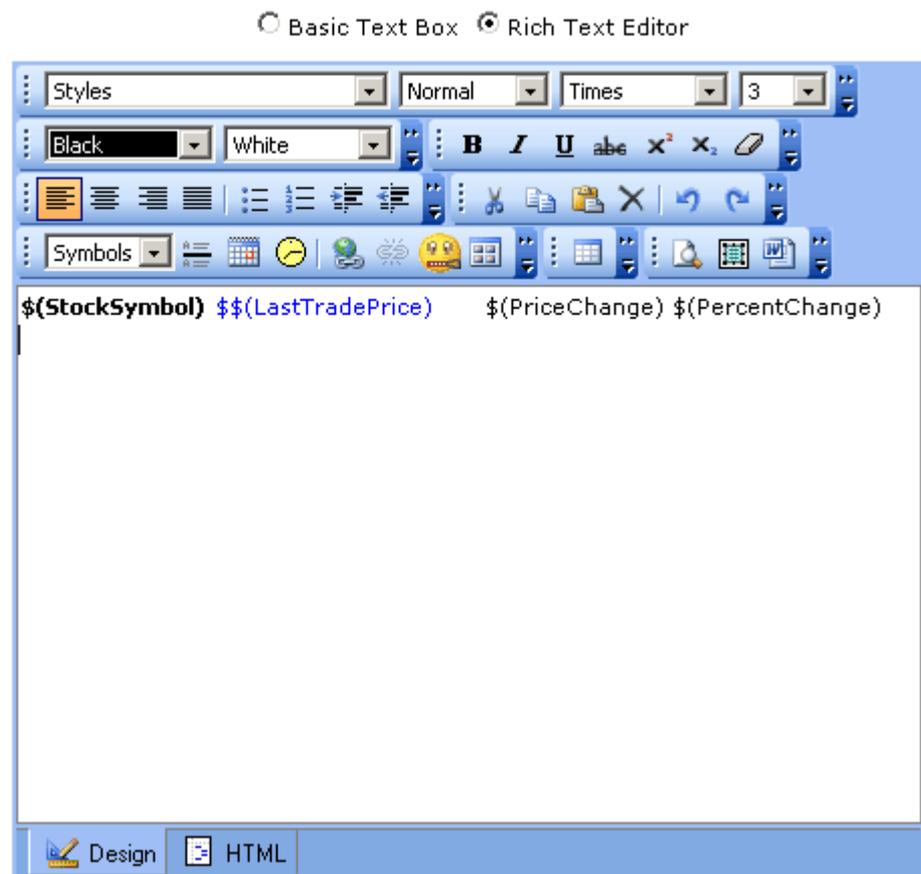

Figure 17: Managing Stock Quotes – Content

The second part of the screen is used for defining the contents of the screen. The following parameters are available inside the second part of the screen:

- **Basic Text Box** – click on this radio button if you want to disable the WYSIWYG editor and work directly in HTML (**note:** meant for advanced users)
- **Rich Text Editor** – choose this option to enable the WYSIWYG editor and use various formatting options
- **Content Template** – text area for defining the main contents for the stock quotes
- **Available Symbols** – list of available symbols which can be used in order to display various information about the stock quotes such as “**\$(LastTradePrice)**” The full list is available here:
 - **\$(StockSymbol)** – the symbol for this stock
 - **\$(LastTradePrice)** – the last trading price for this stock
 - **\$(LastTradeDate)** – use this parameter to display the date of the last trade
 - **\$(LastTradeTime)** – use this parameter to display the time of the last trade
 - **\$(PriceChange)** - use this parameter to display the change in price
 - **\$(DayOpen)** – use this parameter to display the price of the stock quote at the opening of the market
 - **\$(DayHigh)** - use this parameter to display the highest price during the day
 - **\$(DayLow)** - use this parameter to display the lowest price during the day
 - **\$(Volume)** - use this parameter to display the information about the number of stocks that were traded during the day

- **\$(MarketCap)** - use this parameter to display the total value of a company in the stock market (total shares outstanding x price per share).
- **\$(PrevClose)** - use this parameter to display the information about the previous price of the stock quotes
- **\$(PercentChange)** - use this parameter to display the information about the changes to the stock quotes value in percents
- **\$(52WeekRange)** - use this parameter to display the information about the range of stock quotes for the last 52 weeks
- **\$(EPS)** - use this parameter to display the information about earnings per share
- **\$(PE)** - use this parameter to display the information about price to earnings ratio
- **\$(CompanyName)** – use this parameter to display information about the company name
